**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election of Group I, claims 1-4, method in Paper No. 10 NOV 2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 5-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10 NOV 2003.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Latto 5100242. (LATTO '242)

Latto '242, as seen in figures 1,2,3 and 11 disclose a device and corresponding method of operation which performs the recited manipulation upon the fluid as recited claims 1-4. Latto teaches the moving of a opposed walls 3 and bottom of the container 20 which crates an accelerating radial inward flow of fluid as seen by the converging curved arrows at the bottom section near the central opening

region 7 of a diameter d which then creates an unrestricted axial flow 24, see larger arrow 24, which later creates a vortex ring 27 corresponding to applicants upper curved arrows in applicants figure 1. Latta '242 also teaches that the all may be reciprocated by the devices 26, see claim 7.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
